

## Particle Counter Calibration

Your APC & FCM calibration solution

*A key step in a particle counting programme is the instrument calibration and its traceability to National Certified Reference Materials.*

*IFTS calibration suspensions were designed*

### GET THE MOST ACCURATE CALIBRATION WITH SCS400

In order to remain reliable, your **Automatic Particle Counters** and **Fluid Contamination Monitors** must be **regularly calibrated**.

APCs must be calibrated as per ISO 11171 or ISO 11943 and FCMs as per ISO 21018.

**ACCURATE CALIBRATION ENSURES BETTER COMPARABILITY OF RESULTS AND STRONGLY CONTRIBUTES TO PRODUCT QUALITY AND PROCESS RELIABILITY**

Primary calibration with SRM 2806b suspensions supplied by NIST\*

Secondary calibration with SCS400 suspensions supplied by IFTS\*

**THE MOST RELIABLE AND ACCURATE CALIBRATION FOR YOUR EQUIPMENT**

*\*Both manufactured by IFTS*

### WHY SCS400 BY IFTS IS BEST FOR YOU?

As the **manufacturer of NIST SRM 2806b**, IFTS provides secondary calibration suspensions of the highest quality. SCS400 suspensions are **manufactured with the same equipment and checked according to the same requirements as SRM 2806b**.

#### **Shipping conditions:**

Supplied with individual particle size distribution certificate.  
Can be delivered by batches of 10 to 300 bottles at a time.  
Delivery time: 2 weeks, excluding shipment  
Unit cost: \$275 per bottle

**IFTS, Inc. Headquarters:**  
200 Pond Avenue  
Middlesex, NJ 08846 USA

Tel: 732-629-7548  
Fax: 732-629-7556
